*Jesus Christ Superstar* is a famous rock opera created by *Tim Rice* and *Andrew Lloyd Webber*. Told entirely in songs, images and music it traces the last seven days of Christ's life.

It all started with a single called *Superstar* in 1969. Although it was banned on many radio stations it shortly became so popular that the recording sessions of a double album were started. The album took 5 months to record. When it finally came out, *Jesus Christ Superstar* became the best-selling album of the year in the US.

The next important stage in the history of *Superstar* followed when it opened as a theatre performance on Broadway on 12 October 1971 and later in the West End, London on 9 August 1972.

Then came the movie in 1973. It was shot on location in Israel, and combined the Biblical with modern-day elements.
